4	Information	Duo Inc. needs to increase production capacity to meet increasing demand for an existing product. A new machine, with a useful life of four years and a maximum output of 600,000 units per year, could be purchased for \$800,000, payable immediately. The salvage value of the machine after four years would be \$30,000. Forecast demand and production over the next four years is as follows:

Fixed costs of production associated with the new machine would be \$5240,000 in the first year of production, increasing by \$20,000 per year in each subsequent year of operation. Duo pays tax at an annual rate of 30%. Assume for simplicity that the machine will be depreciated 25% per year over the four years of use. Duo uses its after-tax weighted average cost of capital of 10% when appraising investment projects.
