Rethwisch, 2012 This text treats the important properties of the three primary types of materials metals ceramics and polymers as well as composites and the relationships that exist between the structural elements of these materials and their properties Emphasis is placed on mechanical behavior and failure including techniques that are employed to improve the mechanical and failure characteristics in terms of alteration of structural elements Furthermore individual chapters discuss each of corrosion electrical thermal magnetic and optical properties New and cutting edge materials are also discussed Even if an instructor does not have a strong materials background i e is from mechanical civil chemical or electrical engineering or chemistry departments he or she can easily teach from this text The material is not at a level beyond which the students can comprehend an instructor would not have to supplement in order to bring the students up to the level of the text Also the author has attempted to write in a concise clear and organized manner using terminology that is familiar to the students Extensive student and instructor resource supplements are also provided Publisher s description *Electrochemistry and*

Corrosion Science Nestor Perez,2016-09-13 The second edition of this textbook includes refined text in each chapter new sections on corrosion of steel reinforced concrete and on cathodic protection of steel reinforced bars embedded in concrete and some new solved examples The book introduces mathematical and engineering approximation schemes for describing the thermodynamics and kinetics of electrochemical systems which are the essence of corrosion science in addition to electrochemical corrosion forms of corrosion and mechanisms of corrosion This approach should capture the reader s attention on the complexity of corrosion Thus the principles of electrochemistry and electrochemical cells are subsequently characterized in simple electrolytes from a thermodynamics point of view Introduction to Materials Science for Engineers
