

A 70.0-kg ice hockey goalie, originally at rest, has a 0.110-kg hockey puck slapped at him at a velocity of 39.5 m/s. Suppose the goalie and the puck have an elastic collision, and the puck is reflected back in the direction from which it came. What would the final velocities of the goalie and the puck be in this case? Assume that the collision is completely elastic.

$v_{\text{goalie}} =$ m / s

$v_{\text{puck}} =$ m / s

Talking about Leaving Revisited Elaine Seymour,Anne-Barrie Hunter,2019-12-10 Talking about Leaving Revisited discusses findings from a five year study that explores the extent nature and contributory causes of field switching both from and among STEM majors and what enables persistence to graduation The book reflects on what has and has not changed since publication of Talking about Leaving Why Undergraduates Leave the Sciences Elaine Seymour Nancy M Hewitt Westview Press 1997 With the editors guidance the authors of each chapter collaborate to address key questions drawing on findings from each related study source national and institutional data interviews with faculty and students structured observations and student assessments of teaching methods in STEM gateway courses Pitched to a wide audience engaging in style and richly illustrated in the interviewees own words this book affords the most comprehensive explanatory account to date of persistence relocation and loss in undergraduate sciences Comprehensively addresses the causes of loss from undergraduate STEM majors an issue of ongoing national concern Presents critical research relevant for nationwide STEM education reform efforts Explores the reasons why talented undergraduates abandon STEM majors Dispels popular causal myths about why students choose to leave STEM majors This volume is based upon work supported by the Alfred P Sloan Foundation Award No 2012 6 05 and the National

Science Foundation Award No DUE 1224637 Cybernetics and the Philosophy of Mind Kenneth Sayre,2014-11-20 This book published in 1976 presents an entirely original approach to the subject of the mind body problem examining it in terms of the conceptual links between the physical sciences and the sciences of human behaviour It is based on the cybernetic concepts of information and feedback and on the related concepts of thermodynamic and communication theoretic entropy The foundation of the approach is the theme of continuity between evolution learning and human consciousness The author defines life as a process of energy exchange between organism and environment and evolution as a feedback process maintaining equilibrium between environment and reproductive group He demonstrates that closely related feedback processes on the levels of the behaving organism and of the organism s nervous system constitute the phenomena of learning and consciousness respectively He analyses language as an expedient for extending human information processing and control capacities beyond those provided by one s own nervous system and shows reason to be a mode of processing information in the form of concepts removed from immediate stimulus control The last chapter touches on colour vision pleasure and pain intentionality self awareness and other subjective phenomena Of special interest to the communication theorist and philosopher this study is also of interest to psychologists and anyone interested in the connection between the physical and life sciences **College Physics** Roger A.
