of Teaching and Learning in Online Learning Environments Rahimi, Regina, Soares, Lina, 2025-02-06 The exploration of teaching and learning in online environments is increasingly relevant as education continues to shift toward digital spaces

Understanding how instructors and learners engage with and enhance these virtual experiences is vital for improving educational outcomes and fostering more effective learning communities. This focus on the Scholarship of Teaching and Learning (SoTL) in online contexts provides valuable insights that can influence pedagogical practices across disciplines. As the demand for quality online education grows, the impact of such research can lead to more equitable, accessible, and engaging educational opportunities for diverse learners worldwide. Enhancing the Scholarship of Teaching and Learning in Online Learning Environments demonstrates a variety of ways in which instructors and learners engage in the study of teaching and learning. It provides a unique perspective in that it will feature works of scholars engaging in the work of SoTL specifically in online environments. Covering topics such as community engagement, interactive activity, communications, and pedagogical excellence, this book is an excellent resource for teachers, school administrators, computer scientists, professionals, researchers, scholars, academicians, and more.

Supporting Self-Regulated Learning and Student Success in Online Courses Glick, Danny, Bergin, Jeff, Chang, Chi, 2023-03-07. Students who self-regulate are more likely to improve their academic performance, find value in their learning process, and continue to be effective lifelong learners. However, online students often struggle to self-regulate, which may contribute to lower academic performance. Likewise, less experienced online teachers who are in the process of implementing or have implemented a shift from in-person to distance learning may struggle to enable their students to employ effective self-regulation techniques. *Supporting Self-Regulated Learning and Student Success in Online Courses* examines current theoretical frameworks, research projects, and empirical studies related to the design, implementation, and evaluation of self-regulated learning models and interventions in online courses and discusses their implications. Covering key topics such as online course design, student retention, and learning support, this reference work is ideal for administrators, policymakers, researchers, academicians, practitioners, scholars, instructors, and students. *JOURNAL*, 1996.

The AI Con Emily M. Bender, Alex Hanna, 2025-05-13. A smart, incisive look at the technologies sold as artificial intelligence, the drawbacks and pitfalls of technology sold under this banner, and why it's crucial to recognize the many ways in which AI hype covers for a small set of power-hungry actors at work and in the world. Is artificial intelligence going to take over the world? Have big tech scientists created an artificial lifeform that can think on its own? Is it going to put authors, artists, and others out of business? Are we about to enter an age where computers are better than humans at everything? The answer to these questions, linguist Emily M. Bender and sociologist Alex Hanna make clear, is no: they wish, LOL, and definitely not. This kind of thinking is a symptom of a phenomenon known as AI hype. Hype looks and smells fishy. It twists words and helps the rich get richer by justifying data theft, motivating surveillance capitalism, and devaluing human creativity in order to replace meaningful work with jobs that treat people like machines. In *The AI Con*, Bender and Hanna offer a sharp, witty, and wide-ranging take-down of AI hype across its many forms. Bender and Hanna show you how to spot AI hype, how to deconstruct it, and how to expose the power grabs it aims to hide. Armed with these tools, you will be prepared to push back against AI hype.
