Investments at Cliniqa Corporation Vy Nguyen, California State University San Marcos. College of Science and

Mathematics, 2014 Management teams are frequently charged with making informed decisions for valid investments and cost saving ideas for laboratory instruments Cliniqa Corporation is a research and manufacturing company that produces quality controls and calibrators for a number of in vitro diagnostic instruments The semester in residence project resulted in an

organized investment evaluation procedure for management to consider all the relevant factors before committing to an instrument procurement decision Purchasing new equipment can extend the capabilities of the company into additional product lines and strategically target desired customers It was important to establish an expert system to harvest the knowledge of senior management and to potentially improve on the current evaluation techniques The research methodology included an evaluation of the current instruments in operation to set a baseline on the previous evaluations and to establish a quantitative ranking system The sensitivity of the factors required the continuous fine tuning of the analysis tool The result of the project was a five step evaluation tool with proof of concept pilot testing for the recommendation of instrument investment The process began with setting constraints based on the needs and requirements that the company can commit to for asset acquisition Secondly data was collected for the criteria of manufacturer type of analyzer first year introduced to market square footage routine maintenance assay menu capability test throughput ability of being an open channel instrument and continuous runs requirement for mainline water hookups and incremental training required for a routine operator Then quantitative ranking values 1 10 were applied and compared against the constraints Third was to calculate the total cost of ownership for qualified instruments The fourth step was to consider the qualitative factors of instrument usability upholding company reputation customer satisfaction self imposed analyzers for strategic contractual purposes and product line expansion The last step of the tool was to analyze all the factors involved for the recommendation of new instruments The pilot testing proposed the purchase of a refurbished Roche cobas e411 Abbott Architect i1000sr or Siemens Advia Centaur CP to meet the company s objectives of maintaining quality products and boosting overall profitability

P1-24-05 - Serum Vitamin-mineral Profiles U2013 Association with Breast Cancer Risk Including Dietary Patterns and Supplements Use: a Case-control Study Beata Krusinska,2017 Breast cancer is the most diagnosed cancer among women worldwide Studies regarding diet and blood levels of vitamins and minerals in the breast cancer aetiology are limited and the results are inconclusive We investigated the association between serum vitamin mineral profiles V MPs and breast cancer BC risk with including dietary patterns DPs and use of supplements This case control study involved 420 women aged 40 79 years from north eastern Poland including 190 newly diagnosed breast cancer cases The serum concentrations of vitamins folate cobalamin 25 OH vitamin D and minerals iron calcium magnesium were marked in 129 post menopausal women 82 controls 47 cases using an immune analyser Cobas e411 and a Cobas Integra 400plus auto analyser Roche Diagnosticssu00ae respectively A posteriori V MPs were derived with a Principal Component Analysis PCA Three PCA driven DPs Non Healthy Prudent and Margarine and Sweetened Dairy were described previously A logistic regression analysis was performed The odds ratios ORs and 95% confidence interval 95% CI were calculated Two serum V MPs were identified The u2018Folate Cobalamin Vitamin Du2019 profile was loaded heavily by the folate factor loading 0 82 cobalamin 0 81 and vitamin D 0 49 The u2018Iron Calciumu2019 profile was loaded heavily by the iron 0 81 and calcium 0 77 The u2018Magnesium vitamin

Du2019 profile was loaded heavily by the magnesium 0.92 and vitamin D 0.39. The risk of BC was lower by 88% OR 0.12 95%CI 0.02-0.21. P2-29-01 - Serum Inflammatory Profiles U2013 Association with Breast Cancer Risk Including Dietary Patterns: a Case-control Study Beata Krusinska, 2017. Breast cancer is the most common cancer among women worldwide. Diet and inflammation have been associated with carcinogenesis. However, there are limited studies regarding both blood levels of inflammatory markers and diet with respect to the risk of breast cancer. We assessed the association between serum inflammatory profiles and breast cancer BC risk with including dietary patterns (DPs). This case-control study involved 420 women aged 40-79 years from north-eastern Poland, including 190 newly diagnosed breast cancer cases. The serum concentrations of C-reactive protein (CRP), interleukin 6 (IL-6), and leukocytes (including neutrophil and lymphocyte count) were measured in 129 postmenopausal women (82 controls, 47 cases) using a Cobas Integra 400plus auto analyser, an immune analyser Cobas e411 (Roche Diagnostics), and a haematology analyser MEK 7300 (Nihon Kohden), respectively. A posteriori inflammatory profiles were derived with a Principal Component Analysis (PCA). A logistic regression analysis was performed. The odds ratios (ORs) and 95% confidence interval (95% CI) were calculated. The ORs were adjusted for age, BMI, socioeconomic status, overall physical activity, smoking status, abuse of alcohol, age at menarche, number of children, oral contraceptive use, hormone replacement therapy use, family history of breast cancer, vitamin/mineral supplements use, hormone receptor status of breast cancer, and PCA-driven DPs. Non-Healthy Prudent and Margarine and Sweetened Dairy score. Two serum inflammatory profiles were identified. The u2018CRP IL-6 u2019 profile was loaded heavily by the interleukin 6 factor (loading 0.78) and C-reactive protein factor (loading 0.75). The u2018Neutrophil Lymphocyte u2019 profile was loaded heavily by the lymphocyte factor (loading 0.86) and neutrophil count factor (loading 0.70). The risk of BC was six times higher (OR 6.05, 95%CI 1.93-18.91, p=0.05) in the third tertile of serum u2018CRP IL-6 u2019 profile compared to the first or second tertile. The risk of BC was three times higher (OR 3.11, 95%CI 1.05-9.20, p=0.05) at the level of serum IL-6 (3.10 pg/mL) and seven times higher (OR 7.48, 95%CI 2.31-24.29, p=0.001).

Validatie van een bepaling van Tacrolimus en Cyclosporine A op volbloed met behulp van de cobas e411 Melissa D'haeyer, 2014

Précision du dosage de la progestérone le jour du déclenchement par hCG en fécondation in vitro Simon Colombe, 2019. L'élution de la progestérone le jour du déclenchement de l'ovulation par hCG. EP hCG est associée à une diminution du taux de grossesse et est désormais largement utilisée comme seuil de décision en matière de traitement de la fertilité. Cependant, plusieurs études ont analysé l'impact de l'EP hCG sur les taux de grossesse par FIV avec des résultats contradictoires, potentiellement explicables par des valeurs de seuil variables, parfois proches du niveau de sensibilité des tests utilisés. Nous avons effectué une étude observationnelle portant sur 215 chantillons de sérum de femmes ayant bénéficié d'un transfert d'embryons frais après fécondation in vitro FIV au cours de l'année 2017. Nous avons comparé les niveaux de progestérone sérique obtenus avec l'automate Beckman Coulter Access II, ceux obtenus avec l'automate Roche Cobas e411 et la spectrométrie de masse LC-MS.

MS Une importante différence a été observée dans les taux sériques de progestérone mesurés avec les deux essais immunologiques en particulier pour les faibles valeurs de progestérone et entre un automate et la spectrométrie de masse. Dans les concentrations de progestérone allant jusqu'à 3 ng/mL, le coefficient de corrélation entre les deux automates était de 0,723. La pente de la droite de régression montrait des valeurs moyennes supérieures de 19% avec le Beckman Coulter Access II par rapport au Roche Cobas e411 et des valeurs supérieures de plus de 30% pour les concentrations basses de progestérone. Les taux de progestérone sont cliniquement cruciaux et les différences de résultats retrouvés entre les automates peuvent impliquer des décisions incorrectes dans la gestion d'une FIV.

Cobas E411 : Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have captivated audiences this year. Cobas E411 : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
