

# CODE SWITCHING

"Code-switching is a linguistic phenomenon in which speakers switch back and forth between two or more languages or language varieties in the context of a single conversation or utterance" (Rampton, 1995).

## DEFINITION

Code-switching refers to the act of using multiple languages or language varieties in a single situation. It is regularly used by minority groups when switching between interactions within their subculture and interactions with the dominant culture.

## EXAMPLE

In the classroom

Schools require students to use standard language expressions, and those growing up in minority communities must code-switch.

African American children, for example, constantly switch between African-American Vernacular English and standard English.
