

Physical & Chemical Properties

All substances have properties that we can use to identify them.

For example we can identify a person by their face, their voice, height, finger prints, DNA etc.. The more of these properties that we can identify, the better we know the person. In a similar way matter has properties - and there are many of them.

There are two basic types of properties that we can associate with matter.

These properties are called Physical properties and Chemical properties:

Physical properties are properties of an element or compound that can be observed without a chemical reaction of the substance.

Examples : A substance's color and density are physical properties.

Chemical properties are properties of an element or compound in chemical reactions.

For example, the fact that sodium reacts with water is a chemical property.

Program Earth Jennifer Gabrys, 2016-04-13 Sensors are everywhere Small flexible economical and computationally powerful they operate ubiquitously in environments They compile massive amounts of data including information about air water and climate Never before has such a volume of environmental data been so broadly collected or so widely available Grappling with the consequences of wiring our world Program Earth examines how sensor technologies are programming our environments As Jennifer Gabrys points out sensors do not merely record information about an environment Rather they generate new environments and environmental relations At the same time they give a voice to the entities they monitor to animals plants people and inanimate objects This book looks at the ways in which sensors converge with environments to map ecological processes to track the migration of animals to check pollutants to facilitate citizen participation and to program infrastructure Through discussing particular instances where sensors are deployed for environmental study and citizen engagement across three areas of environmental sensing from wild sensing to pollution sensing and urban sensing Program Earth asks how sensor technologies specifically contribute to new environmental conditions What are the implications for wiring up environments How do sensor applications not only program environments but also program the sorts of citizens and collectives we might become Program Earth suggests that the sensor based monitoring of Earth offers the prospect of making new environments not simply as an extension of the human but rather as new technogeographies that connect technology nature and people

[An Environmental History of the Civil War](#) Judkin Browning, Timothy Silver, 2020-02-20 This sweeping new

history recognizes that the Civil War was not just a military conflict but also a moment of profound transformation in Americans relationship to the natural world To be sure environmental factors such as topography and weather powerfully shaped the outcomes of battles and campaigns and the war could not have been fought without the horses cattle and other animals that were essential to both armies But here Judkin Browning and Timothy Silver weave a far richer story combining military and environmental history to forge a comprehensive new narrative of the war s significance and impact As they reveal the conflict created a new disease environment by fostering the spread of microbes among vulnerable soldiers civilians and animals led to large scale modifications of the landscape across several states sparked new thinking about the human relationship to the natural world and demanded a reckoning with disability and death on an ecological scale And as the guns fell silent the change continued Browning and Silver show how the war influenced the future of weather forecasting veterinary medicine the birth of the conservation movement and the establishment of the first national parks In considering human efforts to find military and political advantage by reshaping the natural world Browning and Silver show not only that the environment influenced the Civil War s outcome but also that the war was a watershed event in the history of the
