

The background of the book cover features a religious painting. At the top, a woman with a halo and a cross is depicted. A white cloth is draped across the middle of the image, partially covering the painting. Below the cloth, the lower legs and feet of several people are visible, suggesting a public display or a religious ceremony. The overall scene is dimly lit, with the white cloth providing a stark contrast to the darker background.

David Held Models Of Democracy:

Models of Democracy, 3rd Edition David Held, 2006 Models of Democracy provides a critical reassessment of major theories of democracy from ancient Greece to the present along with the author's own prescription for revitalizing contemporary democratic politics *The Political Theory of Global Citizenship* April Carter, 2013-07-04 This book provides a comprehensive overview of the meaning of cosmopolitanism and world citizenship in the history of Western political thought and in the evolution of international politics since 1500 Providing an invaluable overview of earlier political thought recent theoretical literature and current debates this book also discusses recent developments in international politics and transnational protest It will be of great interest to those specialising in political theory International Relations and peace conflict studies It will also interest those already acting as global citizens

The Circular Structure of Power Torben Bech Dyrberg, 1997 Few concepts in social theory have been used so extravagantly in recent years as the notion of power Yet despite its inflated presence the term is still unclear and undertheorized In *The Circular Structure of Power* Torben Dyrberg rises to the challenge of conceptualizing power through a philosophical examination of its uses in contemporary social theory Drawing on the insights of Michel Foucault Ernesto Laclau and Chantal Mouffe Dyrberg brings this continental tradition into a creative dialogue with the Anglo American tradition represented by figures such as Steven Lukes William Connolly Peter Bachrach and Morton Baratz Moreover Dyrberg moves from such abstract considerations to their implications for political and democratic theory through an examination of the work of thinkers as diverse as Robert Dahl John Rawls Jürgen Habermas and Nicos Poulantzas Simultaneously engaging with and defying many of the dominant definitions of power Torben Dyrberg destabilizes and undermines the conventional distinctions and polarities through which power is usually understood The new perspective offered to us by this investigation is one which goes beyond the assumption that power can be based on and derived from either agency or structure as if these categories themselves were not somehow constituted by power

Public Opinion Rosalee A. Clawson, Zoe M. Oxley, 2020-07-21 In *Public Opinion Democratic Ideals Democratic Practice* Fourth Edition Clawson and Oxley link the enduring normative questions of democratic theory to existing empirical research on public opinion Organized around a series of questions In a democratic society what should be the relationship between citizens and their government Are citizens' opinions pliable Are they knowledgeable attentive and informed the text explores the tension between ideals and their practice Each chapter focuses on exemplary studies explaining not only the conclusion of the research but how it was conducted so students gain a richer understanding of the research process and see methods applied in context

European Union and the End of Politics James Heartfield, 2013-05-31 Europe is in crisis but the European Union just gets stronger Greece Portugal Spain and Ireland have all been told that they must submit their budgets to EU appointed bureaucrats The soft coup that put EU officials in charge of Greece and Italy shows that the Union is opposed to democracy Instead of weakening the European Union the budget crisis of 2012 has ended up with the eurocrats

grabbing new powers to dictate terms Over the years the forward march of the European Union has been widely misunderstood James Heartfield explains that the rise of the EU is driven by the decline in political participation Without political contestation national parliaments have become an empty shell Where once elites drew authority from their own people today they draw authority from the European Union and other summits of world leaders The growth of the European Union runs in tandem with the decline in national politics As national sovereignty is hollowed out technocratic administration from Brussels fills the void This account of the rise of the European Union includes a full survey of the major schools of thought in European studies and a valuable guide to those who want to take back control International conference proceedings enhancing citizens' participation in policy making processes in East Asia: comparative analyses ,2018

Jacques Maritain (1882-1973), Christian Democrat, and the Quest for a New Commonwealth M. Susan Power,1992 This study examines Maritain s definition of the common good and personal rights and his analysis of christian democracy Also considers his endorsement of lay participation in Church and political affairs his effort to expand human rights internationally his insistence on social justice for members of the working class and his promotion of religious and racial toleration His vision for a new christian commonwealth has gained increasing significance because of the current opportunity for restructuring European affairs 79 95 196pp 1993 Rediscovering the Democratic Purposes of Education Lorraine McDonnell,P. Michael Timpane,Roger W. Benjamin,2000 Why do America s public schools seem unable to meet today s social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today s education system seems more concerned with producing good employees than good citizens Meanwhile our country s diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today s leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools

national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America's future

The Orthodox Churches in a Pluralistic World Emmanuel Clapsis, 2004 Churches seek to supply their people with pastoral support and theological insight even when the community's self understanding is evolving in the midst of a pluralistic environment This anthology explores various ways in which churches of the Orthodox tradition are meeting the challenges of a post modern world The authors presentations identify contemporary opportunities for Christian witness promoting ministries of healing and renewal within a diverse society Interesting topics such as cultural identity and ethnic conflict globalization and human rights violence forgiveness and reconciliation world mission and spirituality are discussed

On Political Means and Social Ends Ted Honderich, 2003 The moral and political arguments judgements and commitments of Britain's outstanding radical philosopher What society ought we to have and what can we do to try to get it This book sets out to answer these questions beginning with a new essay on the foundation of a liberalism of means and ends John Stuart Mill's *On Liberty* It goes on to consider the culmination of liberal thinking in John Rawls *A Theory of Justice* It argues that liberalism is good intentions not carried forward into rational commitment Conservatism in its past and its present guises is also made clear in its reality So too is the leftism of the past including G A Cohen's attempt to save Karl Marx's theory of history Both are discarded The book argues for another political and social morality the generosity and fellow feeling of the Principle of Humanity It is a consequentialist rather than a mysterious morality and its essential idea is that we should take rational steps to rescue the badly off from lives of wretchedness and other distress This is the commitment that led to Ted Honderich's human and passionate response to 9 11 After the Terror the most controversial book of serious philosophy published in Britain since A J Ayer's *Language Truth and Logic* in 1936 A further chapter considers hierarchic democracy the democracy we have as distinct from the democracy we think we have and the necessity of mass civil disobedience The book ends with an essay that adds to the thinking of After the Terror particularly on the moral right of the Palestinians to their resistance

[The Utilitarian Response](#) Lincoln Allison, 1990-03 This book explores the capacity of utilitarianism to respond to the challenge of theories such as those of Rawls Nozick and Dworkin which focus primarily on the individual Its central questions concern the intellectual coherence and moral acceptability of utilitarian answers to important problems including health care punishment and electoral arrangements Its key themes are the relationship between private ethics and public policy between utility and freedom utility and democracy and the role and limitations of states both internally and internationally

Tradition, Harmony, and Transcendence George F. McLean, 1994 *Constitutions and Political Theory* Jan-Erik Lane, 1996 The author begins by examining the origins and history of constitutionalism then looks at the structure of the state He discusses the need for

constitutions their effect on social and economic outcomes and what makes a fair constitution **Global Humanitarianism**

Robert D. DeChaine, 2005-10-13 In *Global Humanitarianism NGOs and the Crafting of Community* author Rob DeChaine explores a narrative common to the nongovernmental organization community about the promise and confusion of living together in post modern times Palpable in their affective admixture of idealism fear hope anger and uncertainty the protagonists of the story are humanitarian social actors engaged in a vivid social drama Their audience as made apparent by DeChaine s excellent scholarship is intimately engaged in the drama as well According to DeChaine the action takes shape in a multivocal polyphony of solidarity and at times cacophony of protest and dissent with actors mobilizing symbolic resources in the service of uniting a public who would join with them in the cause A major source of the actors labor is symbolic consisting in the successful rallying of formative energies in and around a cluster of key related terms words and phrases in order to dramatize and publicize the exigency of the crisis at hand DeChaine argues that crises are embodied in the form of an intensifying hegemonic struggle over the articulation of community in a global ized world The struggle brings into tension local and global priorities national governments and civil society and state centered forms of identity and allegiance and a broad based vision of global citizenship and belonging DeChaine demonstrates that the crisis of community is one of the defining themes of our contemporary era one that we ignore at our peril This book is not only important to the NGO community but represents cutting edge analysis in rhetoric cultural studies semiotics sociology and social organizations
