explains How to use moving averages Bollinger bands Donchian channels and parabolic stop and reverse with Point and Figure charts How time based indicators such as overbought oversold RSI directional movement and MACD can be used with Point and Figure charts How column volume can be used to assess a column s strength and how volume at box level can be used to assess support and resistance areas How traditional accumulation distribution lines such as on balance volume and volume price trend can be used to enhance the reading of the chart How the analysis of relative strength and spreads can be enhanced using these new techniques Two new Point and Figure based market breadth indicators Finally he introduces a new Point and Figure based oscillator that can also be used on time based charts All topics are illustrated with numerous high quality full colour charts and observations from years of trading experience The techniques described here open up a whole world of new and advanced analysis tools You will see that there is more to Point and Figure than you ever imagined and that it is more flexible than has ever been realised before If you employ Point and Figure analysis ensure you don t miss out on these powerful new techniques be sure to bring your analysis into the 21st century
