Proceedings of the 2023 International Conference on Advances in Computing Research (ACR'23) Kevin Daimi, Abeer Al Sadoon, 2023-05-26

This book includes recent research on Data Science, IoT, Smart Cities, and Smart Energy, Health Informatics, and Network Security. The International Conference on Advances in Computing Research (ACR'23) brings together a diverse group of researchers from all over the world with the intent of fostering collaboration and dissemination of the advances in computing technologies. The conference is aptly segmented into six tracks to promote a birds-of-the-same-feather congregation and maximize participation. The first track covers computational intelligence, which includes among others research topics on artificial intelligence, knowledge representation, and management, application and theory of neural systems, fuzzy and expert systems, and genetic algorithms. The second track focuses on cybersecurity engineering. It includes pertinent topics such as incident response, hardware and network security, digital biometrics, and forensics technologies, and cybersecurity metrics and assessment. Further, it features emerging security technologies and high-tech systems security. The third track includes studies on data analytics. It covers topics such as data management, statistical and deep analytics, semantics, and time series analytics, and a multitude of important applications of data analytics in areas such as engineering, health care, business, and manufacturing. The fourth track on network and communications covers a wide range of topics in both areas, including protocols and operations, ubiquitous networks, ad hoc and sensor networks, cellular systems, virtual and augmented reality, streaming information, centric networks, and the emerging areas in connected and autonomous vehicle communications. Lastly, the final track on cloud and mobile computing includes areas of interest in cloud computing such as infrastructure, service management, and operations, architecture, and interoperability, and federation. This track also includes important topics in mobile computing such as services and applications, communication architectures, positioning, and tracking technologies, the general applications of mobile computing.
