Artificial Intelligence, Design Law and Fashion Hasan Kadir Yilmaztekin, 2022-12-30 Artificial intelligence AI now infiltrates our culture After a couple of difficult winters AI today is a word on everybody's lips and it attracts everyone's attention regardless of whether they are experts or not From Apple's Siri to Amazon's Alexa Tesla's auto driving cars to facial recognition systems in CCTV cameras Netflix's film offering services to Google's search engine we live in a world of AI goods The advent of AI powered technologies increasingly affects people's lives across the globe As a tool for productivity and cost efficiency AI also shapes our economy and welfare AI generated designs and works are becoming more popular Today AI technologies can generate several intellectual creations Fashion is one of the industries that AI can profoundly impact AI tools and devices are currently being used in the fashion industry to create fashion models fabric and jewellery designs and clothing When we talk about AI generated designs we instead focus on the fruits of innovation more best selling apparels more fashionable designs and more fulfilment of customer expectations without paying heed to who the designer is Designers invest a lot of talent time and finances into designing and creating each article of clothing and accessory before they release their work to the public Pattern drafting is the first and

most important step in dressmaking Designers typically start with a general sketch on paper add styles elements and colours revise and refine everything and finally deliver their design to dressmakers AI accelerates this time consuming and labour intensive process Yet the full legal consequences of AI in fashion industry are often forgotten An AI device s ability to generate fashion designs raises the question of who will own intellectual property rights over the fashion designs Will it be the fashion designer who hires or contracts with the AI programmer Will it be the programmer Will it be the AI itself Or will it be a joint work of humans and computers And who will be liable for infringement deriving from use of third party material in AI generated fashion designs This book explores answers to these questions within the framework of EU design and copyright laws It also crafts a solution proposal based on a three step test and model norms which could be used to unleash the authors rights holders and infringers around AI generated fashion designs *Artificial Intelligence in HCI* Helmut Degen,Stavroula Ntoa,2023-07-08 This double volume book set constitutes the refereed proceedings of 4th International Conference AI HCI 2023 held as part of the 25th International Conference HCI International 2023 which was held virtually in Copenhagen Denmark in July 2023 The total of 1578 papers and 396 posters included in the HCII 2023 proceedings was carefully reviewed and selected from 7472 submissions The first volume focuses on topics related to Human Centered Artificial Intelligence explainability transparency and trustworthiness ethics and fairness as well as AI supported user experience design The second volume focuses on topics related to AI for language text and speech related tasks human AI collaboration AI for decision support and perception analysis and innovations in AI enabled systems Digital News Literacy and Participatory Journalism Mirjana Pantic,2026-02-05 Digital News Literacy and Participatory Journalism empowers readers to confidently navigate the complexities of the modern news landscape in an era defined by information overload and questionable content **Remotely Innovative** Tom Coughlan,David Fogarty,2025-07-23 In the near term the future will not belong to AI but it will belong to the people who understand AI and how to strategically leverage its advantages This book gives managers a new perspective on innovation and AI allowing them to seize the future As the pace of change has increased organizations have needed to invest in innovation initiatives to survive and thrive Up until now these models have focused on co location which is no longer an option in some cases and may not be necessary for all leaving organizations scrambling for options Following up on their work in *Managing at a Distance* Tom Coughlan and David Fogarty have developed this guide to help managers navigate the challenges of innovation in a world of hybrid and remote workers amidst the ever increasing use of AI They tackle questions such as the difference between creativity and innovation and how proximity or lack of it impacts teams and present strategic structural and measurement solutions to maximize the role of AI in successful innovation while not minimizing the people who make up organizations Platform agnostic this book will appeal to organizational leaders and managers who work with knowledge workers of any type as well as students and instructors in graduate business courses executive education and corporate training programs AI, Graphics, and Simulation Graham M.
