Womack,2018-03-24 This invaluable guide by Todd F Davis and Kenneth Womack offers an accessible introduction to two important movements in the history of twentieth century literary theory A complementary text to the Palgrave volume Postmodern Narrative Theory by Mark Currie this new title addresses a host of theoretical concerns as well as each field s principal figures and interpretive modes As with other books in the Transitions series Formalist Criticism and Reader response Theory includes readings of a range of widely studied texts including Joseph Conrad s Heart of Darkness Charlotte Bronte s Jane Eyre and F Scott Fitzgerald s The Great Gatsby among others Transitions critically explores movements in literary theory Guiding the reader through the poetics and politics of interpretative paradigms and schools of thought Transitions helps direct the student s own acts of critical analysis As well as transforming the critical developments of the past by interpreting them from the perspective of the present day each study enacts transitional readings of a number of well known literary texts

The Pragmatics of Understanding and Misunderstanding Beatriz Penas,1998 **Intention Interpretation** Gary Iseminger,2010-08-12 an excellent and comprehensive discussion of a debate that was initiated in this century in William Wimsatt s and Monroe C Beardsley s influential article The Intentional Fallacy this is a splendidly conceived and very useful collection of essays Readers will want to take issue with the arguments of individual authors but this is to be expected in a volume at the cutting edge of a fertile philosophical controversy David Novitz The Philosophical Quarterly What is the connection if any between the author s intentions in while writing a work of literature and the truth acceptability validity of interpretive statements about it With this question Gary Isminger introduces a literary debate that has been waged for the past four decades and is addressed by philosophers and literary theorists in Intention and Interpretation Thirteen essays discuss the role of appeals to the author s intention in interpreting works of literature A well known argument by E D Hirsch serves as the basic text in which he defends the appeal to the author s intention against Wimsatt and Beardsley s claim that such an appeal involved the intentional fallacy The essays mostly commissioned by the editor explore the presuppositions and consequences of arguing for the importance of the author s intentions in the way Hirsch does Connections emerge between this issue and many fundamental issues in metaphysics and the philosophy of mind as well as in aesthetics The old New Criticism and current Post Structuralism tend to agree in disenfranchising the author and many people now are disinclined even to consider the alternative Hirsch demurs and arguments like his deserve the careful attention both from critics and sympathizers that they receive here Literary scholars and philosophers who are sympathetic to Continental as well as to Anglo American styles of philosophy are among the contributors This is a timely book appearing as it does when postmodernist views of the death of the author are disappearing quickly from the scene As a collection it exemplifies the best work that is being done on this problem at the moment and it will no doubt inspire further debate The Journal of Aesthetics and Art Criticism T his volume contains important articles illuminating the central debate over the role and relevance of authorial intentions in literary interoperation British Journal of Aesthetics R.C.E.I. ,1995

Contemporary literary criticism Daniel G. Marowski, 1973 Entries include critical commentary brief biographical information a portrait when available a list of principal works and may also include a further reading section *The Campus Trilogy* David Lodge, 2011-10-04 A trio of dazzling novels in a comic mode that the author has now made completely his own a cause for celebration The New York Times Book Review David Lodge's three delightfully sophisticated campus novels now gathered together in one volume expose the world of academia at its best and its worst In *Changing Places* we meet Philip Swallow British lecturer in English at the University of Rummidge and the flamboyant American Morris Zapp of Euphoric State University who participate in a professorial exchange program at the close of the tumultuous sixties Ten years later in *Small World* older but not noticeably wiser they are let loose on the international conference circuit along with a memorable and somewhat oversexed cast of dozens And in *Nice Work* the leftist feminist Dr Robyn Penrose at Rummidge University is assigned to shadow the director of a local engineering firm sparking a collision of ideologies and lifestyles that seems unlikely to foster anything other than mutual antipathy

Contemporary Literary Criticism Jeffrey W. Hunter, 2001-07 Each volume profiles about six to eight novelists poets playwrights short story writers and other creative and nonfiction writers who are currently active or who died after Dec 31 1999 A biographical and critical introduction to each author prefaces a collection of reprinted critical essays and reviews A cumulative title index to the entire series is available separately included in subscription

America and the Americans in Postwar British Fiction Stephan-Alexander Ditze, 2006 National images have been firmly established in western literatures

since classical antiquity Since the seventeenth century these images have made an impact on the reception of the literary works in question and have influenced the production of later generations of writers Despite this early interest of artists in national images it was not until the early twentieth century that such images were addressed by literary scholarship However imagology a branch of Comparative and General Literature is still marked by a widespread terminological incoherence The present study wants to help eliminate this deficit To this end the basic notions image and stereotype are unambiguously defined and made applicable for practical criticism by using the newly coined concept of *imagene* and a structuralist model of images The explanatory power of the conceptual framework proposed is demonstrated by in depth analyses of five British novels of the second half of the twentieth century which focus on the United States of America and its inhabitants

Politics and History in William Golding Paul Crawford, 2002 Provides a politicized and historicized reading of William Golding's novels as a counter to previous universalizing criticism Paul Crawford here argues that an understanding of fantastic and carnivalesque modes in Golding's work is vital if we are to appreciate fully his interrogation of 20th century life

Historical Studies and Literary Criticism Jerome J. McGann, California Institute of Technology, Weingart Foundation, 1985 For the past fifty years literary studies and criticism have been dominated by formalist structural and text centered approaches The editor of this volume Jerome J McGann has been arguing in recent years for more expansive and contextual procedures In this collection of essays he has brought together a group of distinguished collaborators including Terry Eagleton Marilyn Butler Cecil Lang and Sandra Gilbert whose work emphasizes the importance of social and historical methodologies for the study of literary texts Representing a variety of viewpoints and critical strategies these critics together demonstrate the sociohistorical dimensions of literary works provide examples of how studies of such literary works might be pursued and suggest some central areas of investigation The resulting effort to reconstitute some vital and neglected critical approaches will engage students and scholars of literature and move them to reassess current critical assumptions Fundamental to this collection is the sense that literary texts are more than self enclosed verbal constructs In his introduction to the essays editor McGann examines how and why the concept of referentiality fell into disfavor with modern literary schools The antihistorical bias of the New Critics Structuralists and Deconstructionists he argues ultimately limit their critical vision For literature McGann stresses has various points of reference to a larger world of social interactions and historical influence only by recognizing and reconstructing that world can we mine the full meaning and communicative potential of a fictional work
