DuBoulay, I.F. Moseley, 2012-12-06 The publication of proceedings of conferences has often been so delayed that they are useless both to active workers in the field and for currently appropriate teaching Rapid publication on the other hand may impose very difficult conditions upon authors and demand unwelcome sacrifices We wish to thank the many speakers at ESCAT for their co-operation in providing manuscripts and to apologise to those unable for reasons beyond their control to fall in with the rigorous editorial policy To get this book out at the earliest possible moment we have also cut the normal consultation between editors and authors to a minimum One decision made in the interests of uniformity was to replace the various terms used by different writers by one C A T consistent with the title of the Seminar of which the book is a record The organisers of ESCAT decided upon a largely didactic meeting with as little overlap as was practicable between contributions and a determined attempt to view computerised axial tomography in the light of its clinical usefulness As consequence the purpose of this book is to provide a comprehensive introduction to the whole field for clinicians as well as radiologists The editors wish to acknowledge the very efficient help and encouragement of the publishers and the hard secretarial work of Miss G JOHNS as well as the editorial assistance of Dr DEREK KINGSLEY London Spring 1977 G H DU BOULAY I F

**Classification in Theory and Practice** Susan Batley, 2005-01-31 This book covers all of the major library classification schemes in use in Europe UK and US it includes practical exercises to demonstrate their application Importantly classifying electronic resources is also discussed The aim of the book is to demystify a very complex subject and to provide a sound theoretical underpinning together with practical advice and development of practical skills The book fills the gap between more complex theoretical texts and those books with a purely practical approach Chapters concentrate purely on

classification rather than cataloging and indexing ensuring a more in depth coverage of the topic Covers the latest Dewey Decimal Classification 22nd edition Provides practical advice on which schemes will be most suitable for different types of library collection Covers classification of electronic resources and taxonomy construction **Practical Guide to DDC 20, Dewey Decimal Classification** Pogula Sessa Giri Kumar,1990 **Bibliographic Guide to Law** ,1991 *DDC 20 Workbook* Sydney W.
