Dendrochronological Analysis Of Oak Tree Ring:

Tree-ring Dating and Archaeology M.G.L. Baillie,2014-10-24 The analysis of tree ring patterns or dendrochronology is a very exact science and an important dating technique The basis of the method is misleadingly simple that overlap of successive older ring patterns can generate a master chronology and samples of unknown age can then be checked against this This book published originally in 1982 traces the development of a specific project from its inception to the successful completion of some of the longest chronologies in Europe In doing so it looks at some of the problems associated with the subject and at the levels of precision possible After outlining the techniques associated with the measurement and processing of tree ring patterns the author traces an attempt to construct such an independent chronology in a new area The book breaks naturally into sections conditioned by the availability of timbers and these can be listed as modern late medieval medieval early medieval and prehistoric As far as possible the results are presented in the order in which things happened thus preserving the sense of a developing subject

Laurent Marquer,Andrea Seim,Niina Kuosmanen,Triin Reitalu,Olga Solomina,Miikka Tallavaara,2023-02-07 *The Marriage Bed of Henry VII and Elizabeth of York* Peter N. Lindfield,2023-04-20 The Henry VII and Elizabeth of York marriage bed rediscovered in 2010 is an exceptional piece of late medieval English royal furniture no other equivalent example of secular domestic furniture is known to have survived and indeed precious little woodwork from this period remains outside of ecclesiastical settings As a tour de force of medieval royal woodwork the bed offers an unprecedented insight into elite domestic furniture from this period Since its rediscovery the bed has been subjected to a wide array of investigation by furniture specialists medieval historians design historians and scientists Emerging from a decade long multidisciplinary research project this book is the first sustained account of the bed it shows how numerous disciplines covering the arts and conservation sciences can be brought together to assess and interpret such rare historic survivals Broken down into thematic chapters the book explores the bed s form and structure context iconography wood paint physical history provenance including its curious reproduction by George Shaw in Victorian England and relationship with known surviving Tudor furniture as well as Georgian and Victorian Gothic Revival beds Although thought to be a nineteenth century fake this book presents historical archival and scientific evidence to show beyond doubt the bed s late medieval age While grounded upon research presented at a 2019 conference funded by the Institute of Conservation and held at the Victoria and Albert Museum in London the book incorporates additional historical and scientific discoveries made since the conference Written by a range of scientists historians and specialist researchers this volume is a multi disciplinary work of immeasurable value to readers from numerous disciplines

Surrey Archaeological Society Bulletin ,2007 *Tree Rings* Fritz Hans Schweingruber,2012-12-06 At a meeting of dendrochronologists an American colleague described the effects of volcanic eruptions on annual ring formation in bristlecone pines I knew very little about either volcanoes or American pines At the

same meeting European scientists spoke on the dendrochronological dating of lakeshore settlements and the effects of larch bud moth attack on trees in the Alps It is possible that American participants were not in a position to fully appreciate these papers either In other words dendrochronology is an extremely interdisciplinary science its facets range from modern statistics on wood anatomy to the history of art It is difficult even for dendrochronologists to keep in touch with the whole spectrum and even more difficult for the layman to obtain an overall view of the many methods and fields of application In recent times specialisation has begun to hinder communication between the various sectors Archaeologists for instance set up their own dendrochronological laboratories and construct independent chronologies to serve their particular interests The scientific institutions which previously carried out such work are now turning more and more to strongly statistically or biologically oriented questions The full wealth of information contained in tree rings however will be revealed only when dendrochronologists make a concerted effort to relate the findings of the different fields In spite of inevitable specialisation it is necessary that the expert concern himself with the work of his colleagues

The Science of Paintings W. Stanley Jr. Taft, James W. Mayer, 2006-04-18 The physics and materials science behind paintings the pigments binders canvas and varnish that go into making a painting appear the way it does The text discusses the physical principles behind the colors seen and how these change with illumination the various types of paint and binders used in both old and modern paintings and the optics and microscopic structure of paint films Chapters on dating binders and dendrochronology have been contributed by experts in the respective fields
